Red Double Coated Tape:

- Exceptional acrylic adhesive system with a polyester carrier.
- Extremely high tack that adheres to a broad range of difficult materials.
- Designed for high temperature flying splice applications of films, plastics, and paper.
- Ideal for all types of printed and unprinted materials.
- Vibrant red color is easily visible before and after the splice is made.

Pricing for rolls other than those listed are proportional to the 1" price. Add 15% for less than 1" wide.

Pink Transfer Splicing Tape:

- Transfer adhesive tape.
- Provides instant grab and maximum holding power.
- Used to splice a wide range of substrates common to the printing industry.
- Will not degrade when exposed to high temperatures.
