Blank Labels on PET liner

Introducing CRG's newest offering: Blank Labels on PET liner

WHY SWITCH TO PET LINER?

- **EFFICIENCY:** 25 - 30% more labels per roll equals fewer roll changes and less downtime
- **EXCELLENT RELEASE & STRENGTH:** PET's smooth surface guarantees excellent release every time which equals fewer jams, liner breaks, and release issues keeping you up and running
- **SUSTAINABILITY:** PET liners are more easily recycled than paper liners, and with more labels per shipment, your overall carbon footprint is improved!
- **COST SAVINGS:** More labels per shipment equal reduced shipping costs and CRG is passing the lower cost of PET liner vs. auto-apply paper liner on to our customers, which means you benefit from a premium product at a competitive price!
- **EASE OF TRANSITION:** Most label applicators only require a simple recalibration to transition from paper to PET liner.

Our experts can help you decide if making the switch to PET liner is the right choice for your production.

LET'S DISCUSS WHAT IS BEST FOR YOU!
